REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the closest prior art of reference is taught by Neri et al. (WO 02/072301)

Neri et al. teach a method of printing an image onto a plastic three-dimensional surface with non-planar surfaces by an image carrier sheet. A flexible membrane of silicone rubber is lowered over the three-dimensional object with the image carrier sheet thereon. A vacuum is established and the membrane, image carrier sheet, and object are heated by radiant heating elements, in a substantially U-shaped configuration, to cause the image from the carrier sheet to transfer into the surface the carrier sheet is on (abstract; paragraphs 0006-0007; Figure 6).

Neri et al. teaches that an image carrier sheet is heated to make it more flexible after a flexible membrane is lowered over the carrier sheet and prior to establishing a vacuum (abstract). However, the prior art does not teach pre-heating a flexible membrane before establishing a vacuum under the membrane to cause an image carrier sheet to conform to an object, and further heating the image carrier sheet by a flexible heating element to induce transfer from the carrier sheet to the object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
